It is located next to the Yokohama Cultural Museum and the Yokohama Museum of Art. The garden is noted for its karboris (traditional wooden pagodas in a garden setting). In the gardens sits the Kaizakura Shrine. Kaizakura and Opera Garden is adjacent to Kaizu-dori, and contains a dance hall, and shops. There are over 20 karboris, made of pine wood, in the park. One of the more famous of these pagodas is the circa 1896 Yōrōki no Okusaima. Because of its design, it is sometimes called the "Ecotone Pagoda". It sits in one of the park's beautiful reflecting pools, which are at the foot of the hill in the park. The specific aim of this proposal is to determine the solution structure of TraD, both in the absence and presence of TraA. After defining the solution structure of TraD, physical and genetic studies will be performed to determine the mode of interaction between TraA and TraD. Finally, the solution structure of TraA will be determined.Bipolar disorder, autism spectrum disorders, and Tourette's syndrome are
