**System Requirements For Quick Notes ListBox Edition:**

Story mode and Missions require a relatively high end video card (i.e. a dedicated GPU) to run at reasonable frame rates. Diablo III supports hardware that is capable of DirectX 11, so it will run with any DirectX 11 compliant video card. We recommend at least a Radeon HD 7900 series card, though any modern DirectX 11 compliant GPU should work. For optimal performance, we recommend that you use a video card with 4GB or more of RAM. The game is designed to take advantage of additional RAM, but if your card does not have enough
