A: Using regular expressions the following code should do the trick. Uri uri = new Uri(""); WebRequest request = WebRequest.Create(uri); string pattern = @""; var results = Regex.Matches(HttpUtility.UrlDecode(Server.HtmlDecode(HttpUtility.HtmlDecode(Regex.Match(Request.Url.AbsoluteUri, pattern).Value)), Encoding.UTF8), pattern); Update If you have an specific url to match you can just slightly change the regular expression: var uri = new Uri(""); string pattern = @"https?://[^\?&#]+"; var results = Regex.Matches(HttpUtility.UrlDecode(Server.HtmlDecode(HttpUtility.HtmlDecode(Regex.Match(uri, pattern).Value)), Encoding.UTF8), pattern); Update 2 If you want to match any url you can use the following regular expression: string pattern = @ 570a42141b
