The application is extremely basic and you shall notice this from the very first run, as it boasts a minimal interface that only prompts the user to input the word she/he wants to translate. While the blue background might be annoying for many users, the color can be changed from the settings menu, accessible via a right click in the main window. Don't get too excited though, although there's a settings menu as well, the number of available options is very limited, so you can't change anything else besides font and background colors, history length and hotkey. And speaking of hotkeys, English - Georgian Dictionary comes with multiple predefined hotkeys to perform certain actions such as history browsing and font size adjustment. If you're not satisfied with the standard dictionary, then it's probably worth mentioning that English - Georgian Dictionary also supports separate dictionary files, all of which can be loaded with the predefined function keys. It's very important to take a look at the help file as well, again available in the right click menu in the main window because this is the only way to find out the hotkeys we were talking about. Overall, English - Georgian Dictionary is an interesting project, but nothing more. It lacks too many features to become a top product and comes with an interface that could disappoint 99 percent of its users.
